**Pandemic Safety for the Migrant Worker**

**MEMIC**

**Discussion Sections**

- 1) Risk Assessment and Control Plan
- 2) Arrival and Screening
- 3) Managing a Sick Worker
- 4) Shared Housing
- 5) Transportation
- 6) Worksite n Work Areas

3

---

---

---

---

---

---

---

---

4

---

---

---

---

---

---

---

---

**Risk Assessment and Control Plan** **MEMIC**

- ✓ Designate a leader for Covid-19 planning and response
- ✓ Assign key responsibilities for personnel
  - Assessing scope of risk
  - Handling guest workers
  - Effective training and communication
  - Access to current information

5

---

---

---

---

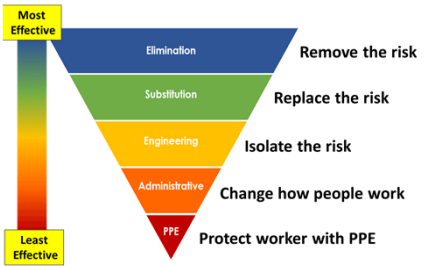

---

---

---

---

**Assessment and Control Plan** **MEMIC**

6

---

---

---

---

---

---

---

---

## Risk Assessment and Control Plan

✓ Exposure assessment should include areas such as:

- Arrival of migrant workers
- Managing a sick worker
- Managing shared housing
- Managing shared transportation
- Managing work areas

7

---

---

---

---

---

---

---

---

## Arrival and Screening

8

---

---

---

---

---

---

---

---

## Arrival and Screening

### Arrival

- ✓ Know travel history prior to arriving in Maine
- ✓ Method of travel to reach Maine (*Contact Tracing*)
- ✓ Universal testing:
  - Quarantine on Arrival for 14-days
    - Daily monitoring
  - COVID-19 universal testing within 72 hours
    - Quarantine until results are proven negative.

---

---

---

---

---

---

---

---

## Arrival and Screening

MEMIC

### Screening

- ✓ Ongoing universal testing for any signs of symptoms
- ✓ Self-evaluation and report any symptoms
- ✓ Screen daily before work
- ✓ Protect workers involved with screening process
- ✓ Protect privacy and confidentiality

---

---

---

---

---

---

## Managing Sick Workers

MEMIC

12

---

---

---

---

---

---

---

---

**Managing Sick Workers** **MEMIC**

**Best Practices**

- ✓ Act Immediately
- ✓ Protect the person handling sick workers
- ✓ Have an action plan ready
  - Isolation for quarantining
  - Medical treatment
  - Access to medical support

13

---

---

---

---

---

---

---

---

**Managing Sick Workers** **MEMIC**

**Best Practices**

- ✓ Prevent spread
  - Contact Tracing (2-days, 6-feet and 10sec.)
  - Notify and quarantine known contacts
  - Educate workers living off property
  - Effecting training to understand risk controls
  - Clean, disinfect and PPE use

14

---

---

---

---

---

---

---

---

**Managing Sick Workers** **MEMIC**

**Return to Work – Persons Under COVID-19 Isolation**

- 1) **Symptom-based strategy** (*Positive with symptoms*)
  - 3 days (72 hours) – No fever, no cold medications, no respiratory symptoms; **and**,
  - 10 days have passed *since symptoms first appeared*.
- 2) **Test-based strategy**
  - Resolution of fever **without** the use of fever-reducing medications **and**
  - Improvement in respiratory symptoms (e.g., cough, shortness of breath), **and**
  - Two consecutive test ≥ 24-hour period
- 3) **Time-based strategy** (*Positive without symptoms*)
  - 10 days since positive test, free from any symptoms.

15

---

---

---

---

---

---

---

---

## Managing Sick Workers

MEMIC

### Return to Work

✓ Effectively communicate:

- Quarantine requirements
- Food, lodging, personal needs
- Financial arrangements

✓ Co-worker training of risk avoidance

16

---

---

---

---

---

---

---

---

## Break

MEMIC

17

---

---

---

---

---

---

---

---

## Shared Housing

MEMIC

18

---

---

---

---

---

---

---

---

## Shared Housing

### Best Practices

- ✓ Provide training and guidance of risk controls
- ✓ Common area cleaning and disinfecting
  - Employer and employee disinfecting policies
  - Use proper cleaning chemicals
- ✓ Dormitory style housing need to be quartered into smaller groups
- ✓ Keep family members together

19

---

---

---

---

---

---

---

---

## Shared Housing

### Best Practices

- ✓ Identify common gathering areas and implement risk controls.
  - Maintain social distancing
- ✓ Limit access to common areas
- ✓ Additional access to disinfecting stations
- ✓ Evaluate HVAC systems and use of fans.
- ✓ System for childcare

The Philadelphia Inquirer/Clayton Koppell 02-03-20

20

---

---

---

---

---

---

---

---

## Shared Housing

### Best Practices

- ✓ Limit available seating next to each other
- ✓ No cafeteria operations
- ✓ No community beverage dispensing stations.
- ✓ No filling water bottles from spicket
- ✓ Use "single use / disposable" cups, plates and utensils.
- ✓ Prohibit community access to refrigerators, microwaves, ice machines, etc.

South China Morning Post 05-12-20

21

---

---

---

---

---

---

---

---

## Shared Housing

MEMIC

### Best Practices

- ✓ Essential migrant and vendors only with entry policy
- ✓ Post “Non-essential visitors and vendors not allowed in facility”
- ✓ Conduct daily health checks:
  - Screen residents for symptoms
  - Check temperatures daily.
  - Protect worker confidentiality
- ✓ Segregated spaces for quarantining workers with confirmed or suspected COVID-19.

---

## Shared Transport

MEMIC

24

---

---

---

---

---

---

---

---

## Shared Transportation

**MEMIC**

- ✓ **Rider separation**
  - Prevent cross contamination
- ✓ **Stagger workers' arrival and departure times**
- ✓ **Clean and disinfect vehicles**
- ✓ **Effective training of risk controls**
  - Hand sanitizing before and after transport
  - PPE
  - Cough & sneeze etiquette

25

---

---

---

---

---

---

---

---

## Shared Transportation

**MEMIC**

- ✓ **Avoid carpooling if possible**
  - Limit people per vehicle
  - Encourage social distancing
  - Encourage hand hygiene
  - Encourage face coverings
  - Clean and disinfect
  - Encourage coughing and sneezing etiquette
- ✓ **Avoid public transport**

Caltrans - California's Transport Authority

26

---

---

---

---

---

---

---

---

## Transportation

**MEMIC**

- ✓ **Prohibit personal travel into community.**
  - Designate key personnel to run errands

27

---

---

---

---

---

---

---

---

28

---

---

---

---

---

---

---

---

**Worksite & Work Areas** **MEMIC**

**Eliminate Risks**

- ✓ **Worker Separation**
  - Arrival
  - During work
  - Breaks
- ✓ **Enlarging work areas**
  - Avoid Sharing of equipment
- ✓ **Adjusting work schedules**
- ✓ **Avoid public and visitors**
- ✓ **Removal of group seating/gathering**

29

---

---

---

---

---

---

---

---

**Worksite & Work Areas** **MEMIC**

**Substitution for Risk Control**

- ✓ **Change the work process**
- ✓ **Change object causing contact exposure**
- ✓ **Automate activities**
- ✓ **Evaluate programs hindering risk control efforts:**
  - Piece work reporting and quarantining efforts
  - Health benefits/co-pay, etc

30

---

---

---

---

---

---

---

---

**Worksite & Work Areas** **MEMIC**

**Risk Engineering Controls**

- ✓ Installing shields or barriers
- ✓ Increase access to commonly used items
- ✓ Modifying equipment
- ✓ Adjusting workflow to allow social distancing
- ✓ Remove/rearranging chairs and tables

Worksite - Dan Clarke/NPR 08-06-15

Portland Press Herald - Staff photo by John Deery

31

---

---

---

---

---

---

---

---

**Worksite & Work Areas** **MEMIC**

**Risk Engineering Controls (Cont.)**

- ✓ Evaluate HVAC system
  - Filter any recycling of air
  - No use of local ventilation fans
    - Evaluate for heat stress
  - Provide at least 10-air changes per hour

Worksite - Dan Clarke/NPR 08-06-15  
Worksite - Dan Clarke/NPR 08-06-15  
Worksite - Dan Clarke/NPR 08-06-15  
Portland Press Herald - Staff photo by John Deery

32

---

---

---

---

---

---

---

---

**Worksite & Work Areas** **MEMIC**

**Administrative Risk Controls (Cont.)**

- ✓ Health monitoring
  - Screen workers for symptoms
  - Check temperatures daily.
  - Protect worker confidentiality
- ✓ Symptom / exposure protocols
- ✓ Contact Tracing

Worksite - Dan Clarke/NPR 08-06-15  
Worksite - Dan Clarke/NPR 08-06-15  
Worksite - Dan Clarke/NPR 08-06-15  
Portland Press Herald - Staff photo by John Deery

33

---

---

---

---

---

---

---

---

**Worksite & Work Areas** **MEMIC**

**Administrative Risk Controls** (Cont.)

- ✓ Cleaning and disinfecting policies
  - Additional times for disinfecting and cleaning
- ✓ Visual cues of risk control efforts
- ✓ Stager arrival, breaks and limit employee interaction
- ✓ Plan for continuing essential business functions during high absenteeism or quarantining efforts

34

---

---

---

---

---

---

---

---

**Worksite & Work Areas** **MEMIC**

**Administrative Risk Controls** (Cont.)

- ✓ Work rules to maintain separation:
  - Work groups same as housing groups
  - Full-time, part-time, seasonal, migrant workforce
- ✓ Risk control monitoring and enforcement
- ✓ Effective worker education and training

35

---

---

---

---

---

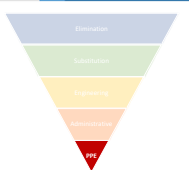

---

---

---

**Worksite & Work Areas** **MEMIC**

**PPE Risk Controls**

- ✓ Face covering
- ✓ Need for respirator
- ✓ Face shield
- ✓ Hand protection
- ✓ First-aid / CPR providers
- ✓ Worker contact (asymptomatic, sick or positive COVID-19 workers)
  - Training = donning, doffing, inspecting, disposing, cleaning and storing*

36

---

---

---

---

---

---

---

---

## Pandemic Safety for the Migrant Worker

MEMIC

- 1) Risk Assessment and Control Plan
- 2) Arrival and Screening
- 3) Managing a Sick Worker
- 4) Shared Housing
- 5) Transportation
- 6) Worksite & Work Areas
